DETAILED ACTION

Page 2

Applicant's election of species 1, claims 11 and 15, in the reply on 2/14/06 is acknowledged. Currently, claims 12 and 16 have been canceled, claims 1-11, 13-15, 17-20 and 45-51 will be considered, and are pending in the application.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-11, 13 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sano (U.S. patent No. 6,309,301) in view of Shih et al (provisional application 60/201,163).

Claim 1: Sano discloses a game console comprising a memory coupled to a processor (Fig. 6; col. 5, line 67; and col. 6, lines 1-4); and a console application configured to allow selection of audio tracks (col. 13, lines 29-31). Sano does not explicitly disclose allowing a user to select audio tracks and creating a soundtrack. However, since Shih discloses allowing a user to incorporate user-personalized songs and sounds into a video game (page 1, last two paragraphs; page 3, first paragraph; page 5, lines 10-15), and since Shih discloses associating encoded tags to the sound file (page 1, last two paragraphs; page 3, lines 3-7 and 10-19; page 4, lines 1-2; and

Page 3

page 6, lines 13-18), shih obviously encompasses allowing the user to select stored audio tracks and creating a soundtrack. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to configure the console application of Sano such that the console application of Sano is capable of allowing the user to select audio tracks and creating a soundtrack containing the selected audio tracks as taught by Shih in order to allow the user to incorporate the user preference songs into the game.

Claim 2 and 4-10: Sano discloses a hard disk drive (col. 11, line 23). Further, implementing a hard disk drive to a game console using a CD, DVD, game disc as a storage medium, retrieving audio data from an online source and storing soundtrack in a memory as a WMA file, and retrieving audio tracks from audio source would have been well known to a person of ordinary skill in the art at the time the invention was made. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to implement a well known hard disk drive to the game console of Sano in order to facilitate storing and retrieving data to the game console.

Claim 3: Sano discloses playing soundtracks through the game console (col. 8, lines 42-46).

Claims 11 and 13: Sano discloses associating the soundtrack with the game (col. 13, lines 29-31). Further, displaying a listing all available soundtracks for playback would have been well known.

Claim 45: Shih discloses associating a name with a created soundtrack (page 3, lines 15-16; and page 5, line 24).

Application/Control Number: 09/802,661

Art Unit: 3713

Page 4

3. Claims 14-15 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sano (U.S. patent No. 6,309,301) in view of Shih et al (provisional application 60/201,163) and Goodman et al (US patent No. 6,928,433).

Claims 14 and 18: refer to discussion in claim 1 above. Further, Goodman discloses a first user interface for facilitate selection of audio tracks (col. 2, lines 60-62), and a second user interface to facilitate playback of soundtracks (col. 9, lines 21-23). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to include the first and the second user interface to the game console of Sano in order to allow the player to playback specific favorite soundtrack.

Claims 15 and 17: refer to discussion in claims 10-11 above.

Claims 19-20: refer to discussion in claim 13 above.

4. Claims 46-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goodman et al (US patent No. 6,928,433).

Claim 46: Goodman discloses a method comprises identifying stored audio tracks (col. 7, lines 26-28; and col. 8, lines 1-8 and 59-65); displaying a portion of the stored audio tracks to a user (col. 2, lines 57-60); receiving information regarding selected audio tracks and creating a soundtrack (col. 2, lines 60-62). Goodman does not explicitly disclose identifying stored audio tracks accessible by a game console. However, since Goodman discloses sound files can be transferred between the source

Application/Control Number: 09/802,661

Art Unit: 3713

device and a game console (col. 11, lines 19-20 and 29-30), Goodman obviously encompasses accessing the audio tracks by a game console so that the game console can playback a specified soundtrack in order to incorporate specified songs into a video game.

Page 5

Claims 47-48: Goodman discloses associating a name with the soundtrack and storing the soundtrack (col. 10, line 4; col. 9, lines 8-9; col. 1, lines 49-51; and col. 2, lines 60-62).

Claims 49-51, identifying audio tracks in the game console or identifying audio tracks from an online source or a plurality of audio sources would have been well known to a person of ordinary skill in the art at the time the invention was made.

Response to Arguments

- 5. Applicant's arguments filed 10/13/05 have been fully considered but they are not persuasive.
- a) In response to applicant's arguments in page 8 through page 13, lines 1-5, regarding to claims 1-11, 13 and 45, refer to the 35 USC 103(a) rejections above.
- b) Applicant's argument in page 13 through page 15, regarding to claims 14 and 46, are most in view of the new ground of rejection.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim Nguyen whose telephone number is 571-272-

Application/Control Number: 09/802,661 Page 6
